TikTok & Shorts Viral Growth Mode Guide

Welcome to the Growth Mode Add-on!

The secret to going viral on TikTok, YouTube Shorts, and Instagram Reels is NOT luck. It is a formula.

1. The Hook (0-3 Seconds)

Your hook is 80% of your video's success.

- Use jarring visual movement in the first frame.

- Keep the caption bold, fast, and exactly center-screen.

- State exactly what the viewer will get, but leave a curiosity gap.

2. Pacing & Retention

- Cut out ALL dead air. If you aren't speaking, cut it.

- Change the visual on screen every 2-3 seconds (B-roll, zoom, pop-up text).

- Use sound effects (swoosh, pop) every time a new element enters the screen.

3. The Loop

- Make the end of your video transition perfectly into the beginning.

- Do not say "thanks for watching" or "subscribe". Those are exit signals.

Use the assets provided in the NexusCut editor to automate this process. Good luck!
